General Procedures:

Please do not cut down any trees within 100 feet of the camp. We are trying to preserve the beauty surrounding the camps. A saw, axe, and splitting maul are provided to cut up firewood.

Please conserve the propane. Turn off the valves on the propane bottles when not in use.

Water is running in the creek near camp. Use the buckets to haul water to camp. Be sure and use the same buckets for drinking water (there should be at least one labeled as such).

To purify your drinking water, place 1/4 teaspoon of calcium hypochlorite in the 2 gallon bucket and stir (the calcium hypochlorite smells like chlorine. However, **be extremely careful when smelling** it as it can burn your nose!). Let stand for **at least 20 minutes**. Then, add 1/4 teaspoon of the sodium thiosulfate to the bucket and stir. After about 5 minutes there will be little chlorine taste.

Keep all snow shoveled off the tents and away from the walls.

You should be able to use a cell phone to contact us and this is generally how we communicate. However, if you don't have a cell phone, we can arrange to come by and check on you during the hunt as the weather permits requires. If there is anything that you need, simply leave a note on the dining table and we will do our best to get it in at the earliest possible time.

If you have an elk that we need to pack out, please be available to guide us to the site. It is your responsibility to have your game prepared to pack out. Please skin and quarter your animal, have it in game bags and hang it from a tree. This will allow it to cool the quickest and assure you the highest quality meet. Please be aware, that if it is not properly prepared for packing there will be an additional charge (\$100/elk; \$75/deer; \$100/bear).

We will leave a note on the table whenever we visit your camp.

Closing Procedures:

Clean all pots, pans and dishes. Wipe down the tables.

Empty the water out of the buckets so they don't freeze and break.

Leave pots and pans upside down so that they drain and don't rust.

Please take all of your food, garbage and supplies out.

Leave plenty of wood cut for the next group to get started.

Be sure and inform us of any supplies that are needed, such as propane.

OTHER

Do not hesitate to email, call or write if you have any questions.
